To whom it may concern,

My name is Patrice F Fote a temporary masters of software engineering graduate candidate here at texas tech university with a bachelor of Arts in University Studies from the University of New Mexico Highlands Computer Science and Music Departments. Working on my bachelor's degree was especially challenging as during that process I was called upon to make a few real world career decisions being an actor with the screen actors guild, to either take on roles resulting in missing a few semesters or putting my career on hold and finishing my degree program. Already committed to a double major, with several certifications like Substance Abuse and Sexual Violence Prevention Counseling, Cisco Networking and IT essentials, Volunteer Music therapy at the NM State Hospital, Acting for television and commercials in addition to broadcast announcing and athletic commitments to the university, I successfully completed my program on the 15th day of May 2017 with a BA:University Studies. Growing up, I learned the importance of a graduate education. Being the last kid in a family of 6 among which are 2 physicians, a pharmacist, an MBA and a Data communications analyst just to list a few educational and career achievements of the people around me, my goals have always been oriented towards forging a solid work ethic and striving to becoming the best in every endeavor I undertook while remembering to stay humble in contributing to the betterment of my community over my own selfish ideals. I strongly believe If accepted I would be a good addition to the community of young development engineers at TTU and would grow to become even more than I wish to attain. Thanks for your consideration as you review my application, I look forward to hopefully be given the opportunity to study and evolve under your guidance. I successfully completed 9 graduate hours within the department this semester resulting in a g.p.a of 3.0 I think Drs. Shin, Zhang and mengel could share their experiences with me in the classes they offered to express how ready I am to work on and finish my software engineering program. My goals looking into your MS: Computer Science was to take the required requisites to complete all electives for the major and focus on Cyber Security as per my advisors recommendation. I would like to grow into a better professional within my field. My real world experiences so far got me to act as broadcast announcer for the highlands university athletics department all through undergrad, in addition to other real life experiences with the CW network as a trained actor fluent in English, French with some comprehensive knowledge of Spanish, Japanese, American Sign Language and German. I intend to grow into an even better asset for our community and hopefully serve as an officer of the US Army upon graduating.

Working on and completing a masters of science degree in software engineering will definitely help me build on these skills and talents preparing me even further to becoming a true elite in our society and better father to my unborn baby.

Respectfully,

<u>Letter of Recommendation for Patrice Fote</u>

<u>Dec 11th 2017</u>

I have known Patrice Fote as a student and bright young man. As a successful student with a strong GPA he has exhibited a diversity and balance in his life skills to this point. He has been an active student I have had the pleasure to teach and know. While I am a Professor, not in music I had been a full time musician for several years. Correspondingly, I recognize talent and have often sought out going to see Patrice perform.

Academics aside, in my experience that is not what makes him so unique. It is that through all his achievements he is typifies the professional model student and in all senses of the word a team player. His academic growth serves his underlying goal to enhance the lives of others! This has been exhibited via his volume of charity work and music performances in the communities he has served.

Most impressive and real indicator of why your institution will only gain from his attendance is his capacity to assimilate information and learn new disciplines IT for security being such a vision I know he shall make a reality.

To have Patrice as an IT Security Specialist will serve to enhance your institution's reputation. While an academician, he possesses real life skills. I have no reservations in recommending Patrice for your IT Security Program. He is well deserving of it, is a team player, flexible and handles pressures and stress exceptionally well.

If I could be of further assistance please do not hesitate to call me Wk. 505 4262024 or Cell 858 6637738.

Sincerely,

William Hayward

I had Patrice in my cs 5373 course. He is smart, but I found he does not have a strong software background hence my reason to move my recommendation from very strong to strong. He has some good ideas, but he needs to give himself time to study. I think he took 3 courses in spring + works which seems hard on him.
